Education

2020–2025 **Mechatronics Engineering**, *University of São Paulo*, São Carlos - SP
- Adaptability, Multidisciplinary, Modeling, Computation, Problem Solving, Python

2023–2025 **Special Studies on Computing**, *ICMC/USP*, São Carlos - SP
- One of the 10 students selected from the Campus
- **Data Structures**, AI, Data Mining, Machine Learning, **Python**, **Git/GitHub**, Object-Oriented Programming

Experience

Professional

02/26–Current **Software Analyst Jr.**, *LUZ Soluções Financeiras*, São Carlos - SP
- Core development of a new regulatory web application for Bacen and integration with legacy systems.
- **C#**, **React**, **Oracle SQL**, Docker, GitLab CI, Amazon Cognito, SQLite

09/24–07/25 **Data Science Consultant Intern**, *Grupo Visagio*
- Application of data science concepts to the business rules of a large bank that was undergoing digitalization.
- **Python**, **SQL**, PowerBI, Microsoft Office, Google Workspace, GenAI, Lifelong Learning, project-driven company

Academic

12/21–01/23 **Mechanical Engineering Director - Voluntary**, *EESC-USP Tupã*
- Coordination and leadership of a core of 10-person core team focused on the design, manufacture, and validation of a Formula SAE Electric car.
- Active work in winning the team's **first national championship** in 2021

Projects

02/26–Current **Regulatory Web Application**, *LUZ Soluções Financeiras*
- Actively participated in the development of a new web app (C#, React) for a major Banco Central do Brasil (Bacen) regulation, delivering a functional MVP in 45 days.
- Implemented authentication using Amazon Cognito (PKCE) and created GitLab CI/CD pipelines to automate NPM publishing and Docker deployments.
- Worked as the sole developer for approx. 20 days during a key phase, enabling leadership to present the app to Bacen and 10+ financial institutions, receiving company-wide recognition.
- Currently integrating the new app with a legacy Delphi/C# system, performing data mapping and database migration to Oracle.

07/25–12/25 **Adultization Identifier - Browser Extension** , *Undergraduate Thesis - USP*, Grade of 10,0/10,0
- A Chrome extension to identify and blur Instagram posts with sexualized content involving children.
- Web Development (**JavaScript**) + Generative AI APIs (**Python**)

07/25–12/25 **Contributions for *ImprovedTube***, *GitHub*, +400,000 users
- Use of Git and **GitHub** to implement new features and bug fixes to a popular YouTube extension

05/25–06/25 **Automated legal process classification system**, *Grupo Visagio*
- Suport and improvement of the on-going system, adding new features and keeping a $> 90\%$ accuracy
- GenAI, Python (**LangChain**, OpenAI API, Gemini API, etc.)

09/24–04/25 **Organization of important data warehouses of a major bank**, *Grupo Visagio*
- Development of interconnected data marts of credit and debit cards using SQL and visualization of KPIs through dashboards

09/23–09/24 **Finite Elements optimization with Neural Networks - Scientific Initiation**, *USP/CNPq*

- Python, **Artificial Neural Networks**, Artificial Intelligence, Scientific Research, MatLab, Optimization

Courses and Certificates

2025–... **The Complete Full-Stack Web Development Bootcamp**, *Udemy*, 62-hour course

- JavaScript (**Node.js**, **React.js**, **jQuery**, etc.), CSS, HTML, SQL, UX

12/2025 **Forward Learning Program**, *McKinsey*, 18-hour course

- Adaptability, Problem Solving, Communicating for Impact

12/2025 **English C1 Advanced**, *EF SET*
