

Pedro Azevedo

Junior Software Engineer

+55 (22) 99702-3461 | pcarriello@gmail.com

LinkedIn: linkedin.com/in/pecazeco | GitHub: github.com/pecazeco

Education

University of São Paulo

São Carlos - SP

B.S. in Mechatronics Engineering

2020 – 2025

- **Skills:** Multidisciplinary Engineering, Computational Modeling, Systems & Control, Problem Solving, Python

ICMC/USP

São Carlos - SP

Special Studies in Computer Science

2023 – 2025

- One of 10 students selected across the entire campus
- **Skills:** Data Structures, Algorithms, Python, Machine Learning

Experience

LUZ Soluções Financeiras

São Carlos - SP

Junior Software Analyst

02/2026 – Present

- **Lead developer** of a regulatory web app to **compute and report mandatory metrics** for *Banco Central do Brasil* (Bacen), delivering one of Brazil's **first compliant solutions** and processing **millions of BRL**, earning **company-wide recognition**.
- Engineered an **even more robust desktop version** integrated into the company's established 20-year enterprise app, alongside developing supplementary web applications.
- Implemented **CI/CD** on GitLab with automatic **deployment** via **Docker**, **authentication** via Amazon Cognito, and Oracle databases.
- **Skills:** .NET, React, Docker, GitLab CI, Oracle SQL, RabbitMQ, Pascal, REST APIs, OAuth 2.0 (PKCE)

Grupo Visagio

São Paulo - SP

Data Science Consulting Intern

09/2024 – 07/2025

- Enhanced an automated legal document classification pipeline for a major bank undergoing digital transformation, achieving **>90% accuracy** with GenAI and Python.
- Integrated credit and debit card data marts using SQL and developed interactive dashboards for KPI visualization.
- **Skills:** Python, SQL, Power BI, GenAI APIs (OpenAI, Gemini), Data Marts

EESC-USP Tupã

São Carlos - SP

Mechanical Engineering Director (Volunteer)

12/2021 – 01/2023

- Led and coordinated a 10-person core engineering team in the design, manufacturing, and validation of a Formula SAE Electric car.
- **Skills:** Communication, Leadership, Adaptability

Projects & Research

Child Safety & Adultization Detection - Extension

Undergraduate Thesis - USP

Grade: 10.0/10.0

07/2025 – 12/2025

- Developed a Chrome extension to identify and blur Instagram posts with sexualized content involving minors.
- **Link:** github.com/pecazeco/InstaChildGuard

Finite Element Optimization with Neural Networks

Undergraduate Research - USP/CNPq

09/2023 – 09/2024

- Applied Artificial Neural Networks (ANNs) in Python and MATLAB to optimize structural Finite Element simulations.
- **Link:** LinkedIn Project

Skills

Languages: C# (1+ yr), TypeScript (1+ yr), Python (5+ yrs), JavaScript (5+ yrs), SQL (4+ yrs), C/C++, Pascal

Frameworks & Tools: .NET, Docker, GitLab CI/CD, Git, Claude Code, React, Angular, RabbitMQ, OAuth 2.0, REST APIs

Databases: Oracle SQL, PostgreSQL, BigQuery, SQLite

Certifications

- McKinsey Forward Program (Adaptability, Problem Solving, Communicating for Impact, 12/2025) - **Link:** credly.com/badges/47f2b7ce-d33f-4012-98ee-a4a63b8792d4/linkedin_profile
- EF SET English C1 Advanced (12/2025) - **Link:** cert.efset.org/en/EMrzv5
