Education

- 2020–2025 **B.S. in Mechatronics Engineering**, *University of São Paulo*, São Carlos - SP
- Multidisciplinary Engineering, Computational Modeling, Systems & Control, Problem Solving, Python
- 2023–2025 **Special Studies in Computer Science**, *ICMC/USP*, São Carlos - SP
- One of 10 students selected across the entire campus

Experience

Professional

- 02/26– Present **Junior Software Analyst**, *LUZ Soluções Financeiras*, São Carlos - SP
- **Lead developer** of a pioneering financial regulatory web application and its desktop version, while also building other web applications.
 - Full-stack development, CI/CD pipelines, database modeling, direct institutional client support and bug fixes.
 - **C#**, React, Docker, GitLab CI, Oracle SQL, RabbitMQ, Pascal, REST APIs, OAuth 2.0 (PKCE)
- 09/24–07/25 **Data Science Consulting Intern**, *Grupo Visagio*
- Applied data science methodologies to core business rules for a major bank undergoing digital transformation.

Academic

- 12/21–01/23 **Mechanical Engineering Director (Volunteer)**, *EESC-USP Tupã*
- Led and coordinated a 10-person core engineering team in the design, manufacturing, and validation of a Formula SAE Electric car.

Projects

- 02/26– Present **Regulatory Web/Desktop Application**, *LUZ Soluções Financeiras*
- Lead developer of a regulatory web app designed to **calculate and report mandatory metrics** required by *Banco Central do Brasil* (Bacen), delivering one of the **first compliant solutions in Brazil** and actively processing **millions of BRL** across dozens of institutional clients.
 - Implemented **authentication** using Amazon Cognito (PKCE) and configured GitLab **CI/CD pipelines** to automate NPM publishing and **Docker deployments**.
 - Enabled leadership to present the app to Bacen and 10+ financial institutions, receiving **company-wide recognition**.
 - Engineered an **even more robust desktop version** integrated into the company's established 20-year enterprise application.
- 07/25–12/25 **Child Safety & Adultization Detection - Extension**, *Undergraduate Thesis - USP*, Grade: 10.0/10.0
- Developed a Chrome extension to identify and blur Instagram posts with sexualized content involving minors.
- 07/25–12/25 **Open-Source Contributions to ImprovedTube**, *GitHub*, 400,000+ users
- 05/25–06/25 **Automated Legal Document Classification System**, *Grupo Visagio*
- Enhanced the ongoing production pipeline, adding new features while maintaining **>90% accuracy**.
- 09/24–04/25 **Data Mart Integration & Analytics for a Major Bank**, *Grupo Visagio*
- Integrated credit and debit card data marts using SQL and developed interactive dashboards for KPI visualization.
- 09/23–09/24 **Finite Element Optimization with Neural Networks - Undergraduate Research**, *USP/CNPq*
- Python, **Artificial Neural Networks**, Artificial Intelligence, Scientific Research, MATLAB, Optimization

Courses and Certificates

- 12/2025 **Forward Learning Program**, *McKinsey*, 18-hour course
- Adaptability, Problem Solving, Communicating for Impact
- 12/2025 **English C1 Advanced**, *EF SET*
