Education

- 2020–2025 **B.S. in Mechatronics Engineering**, *University of São Paulo*, São Carlos - SP
- Multidisciplinary Engineering, Computational Modeling, Systems & Control, Problem Solving, Python
- 2023–2025 **Special Studies in Computer Science**, *ICMC/USP*, São Carlos - SP
- One of 10 students selected across the entire campus

Experience

Professional

- 02/26–Present **Junior Software Analyst**, *LUZ Soluções Financeiras*, São Carlos - SP
- **Lead developer** of a regulatory web app to **compute and report mandatory metrics** for *Banco Central do Brasil* (Bacen), delivering one of Brazil's **first compliant solutions** and processing **millions of BRL**, earning **company-wide recognition**.
 - Engineered an **more robust desktop version** integrated into the company's established 20-year enterprise app.
 - Resolved customer **tickets** and fixed **bugs** for the app, reported via CX.
 - Implemented **CI/CD** on GitLab with automatic **deployment** via **Docker**, **authentication** via Amazon Cognito, and Oracle databases.
 - **.NET**, React, Docker, GitLab CI, Oracle SQL, RabbitMQ, Pascal, REST APIs, OAuth 2.0 (PKCE)
- 09/24–07/25 **Data Science Consulting Intern**, *Grupo Visagio*, São Paulo - SP
- Enhanced an automated legal document classification pipeline for a major bank undergoing digital transformation, achieving **>90% accuracy** with GenAI and Python.
 - Integrated credit and debit card data marts using SQL and developed interactive dashboards for KPI visualization.
 - **Python**, SQL, Power BI, GenAI APIs (OpenAI, Gemini), Data Marts

Academic

- 12/21–01/23 **Mechanical Engineering Director (Volunteer)**, *EESC-USP Tupã*, São Carlos - SP
- Led and coordinated a 10-person core engineering team in the design, manufacturing, and validation of a Formula SAE Electric car.
 - Contributed to winning the team's **first national championship** in 2021.

Projects & Research

- 07/25–12/25 **Child Safety & Adultization Detection - Extension**, *Undergraduate Thesis - USP*, Grade: 10.0/10.0
- Developed a Chrome extension to identify and blur Instagram posts with sexualized content involving minors.
- 09/23–09/24 **Finite Element Optimization with Neural Networks**, *Undergraduate Research - USP/CNPq*
- Applied Artificial Neural Networks (ANNs) in Python and MATLAB to optimize structural Finite Element simulations.

Skills & Certifications

- Languages C# (1+ yr), TypeScript (1+ yr), Python (5+ yrs), JavaScript (5+ yrs), SQL (4+ yrs), C/C++, Pascal
- Frameworks & Tools .NET, Docker, GitLab CI/CD, Git, Claude Code, React, Angular, RabbitMQ, OAuth 2.0, REST APIs
- Databases Oracle SQL, PostgreSQL, BigQuery, SQLite
- Certifications **McKinsey Forward Program** (Adaptability, Problem Solving, Communicating for Impact, 12/2025)
- EF SET English C1 Advanced** (12/2025)
